**Across a Thousand Dead Worlds** is a new horror space exploration tabletop roleplaying game that can be enjoyed as a **single player** experience, or in a group of up to five players, **with or without a Game Master** - by Blackoath Entertainment!

You'll create your **Deep Diver**, using a **free-form character creation system**, and begin your journey across the galaxy where you'll discover abandoned research facilities, explore scientific outposts, and traverse other dilapidated sites in search for **ancient alien technology**.

Take refuge aboard **Karum Station**, your home between missions (as long as you pay the fees, of course), and enjoy a drink with your crewmates before spending your hard earned credits on equipment for the next mission. Grab your gear, check your vitals, and prepare to deploy **Across a Thousand Dead Worlds!**

## GAME OVERVIEW ▼

- > Solo, co-op, or traditional GM-led gameplay
- > Dark sci-fi setting (human-centric)
- > Simple D20 resolution mechanics
- > Deep and nuanced tactical combat, with optional simpler zone-based combat
- > Full GM emulation rules
- > Hundreds of tables to randomize all aspects of gameplay, from planet generation to NPC details or creature behavior
- > Randomly generated missions and activities
- > Deep character customization via talents and detailed gear

**Across a Thousand Dead Worlds** is not only a **complete RPG**, but a **sci-fi toolbox**. Need to generate a planet or an alien station for your favorite sci-fi RPG? Would you like to **solo any other sci-fi RPG** but don't have the tools to do so? Roughly half of the book is dedicated to random tables and tools that can be easily implemented into any other sci-fi game.
